

## AUTOMOTIVE BEARINGS

Wheel bearings

Automobile air conditioner bearing

Automotive water pump bearing

Automotive clutch release bearing

### AUTOMOTIVE BEARINGS

Inntec manufactures bearings that make the vehicle safer, more comfortable and more environmentally-friendly. Our products include small and light high quality wheel hub bearings with sustained life, power-boosting water pump bearings crafted by advanced technology, tensioner bearings as a key component of automotive engine, smooth-running and wearing-resistant transmission bearings.

All our automotive wheel bearings, transmission and gear box bearings, generator bearings, clutch and tensioner bearings are manufactured with optimized design and advanced technology using premium heat-treated high carbon chromium bearing steel. They can be divided into five bearing categories: deep groove ball bearings, tapered roller bearings, angular contact ball bearings and needle roller bearings.

#### FEATURES

- Precision grade available with P0, P6 and P5.
- Optimized internal clearance in accord with working conditions as per customers' requirements.
- Cage material available with sheet steel, polyamide, brass and bakelite.
- Imported clean lubrication grease to reduce friction and achieve low-noise and heat-resistant performance and long life.
- Seals and shields preventing grease leakage and contamination.
- Optimized design to cope with high or low temperature environments.
- bearings with snap ring groove, snap ring or tension ring on one side or both sides are also available.
- various applications in axle, gear box, clutch, wheel hub, generator, starter motor, air conditioner, etc.
