

CUSTOM-BUILT NON-STANDARD BEARINGS

CUSTOM-BUILT NON-STANDARD BEARINGS

InnTec manufactures bearings that meet different industry needs. They are non-standard either in dimensions or functions, including bearings with a bigger outer ring and smaller inner ring, bearings with different-thickness inner and outer rings, heat-resistant and cold-resistant bearings, super high-speed bearings, erosion-resistant bearings, high-load bearings, full ceramic and hybrid ceramic bearings, stainless steel bearings, plastic coated roller bearings and stamped bearings. Supplied samples or drawings are welcome. |
